

RING SIZING GUIDE

Size and dimensions are approximate.

Make sure your printer is set to 100-percent.

Do not select "fit to print."

Lay a quarter on top of the image above.

If printed correctly, it will fit perfectly.

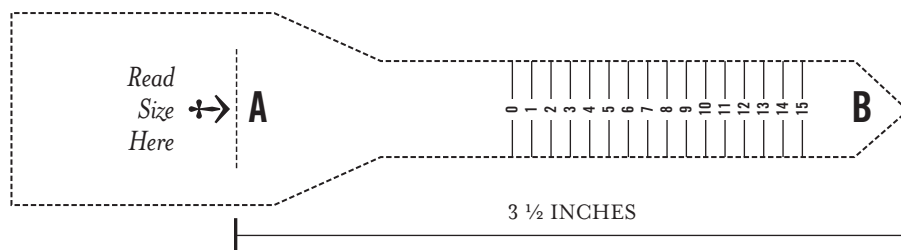

SIZING TIP:

To avoid purchasing rings that are too big, measure your finger at the beginning of the day when your hand are less swollen.

METHOD A: MEASURE YOUR FINGER

You can verify that the ring sizer printed correctly by measuring it with a ruler. It should measure 3 1/2 inches from "A" to "B".

1. Cut the sizer out following the dotted lines.
2. Cut a slit on the dotted line for Slot "A".
3. Wrap the sizer around the finger where the ring will be worn. Make sure the numbers face out.
4. Pull the end of "B" through slot "A" until the sizer is snug. Make sure to allow room for your knuckle to pass through
5. The number that appears next to "A" is your ring size.
6. If the measurement lands between two numbers, your size is a half size.

METHOD B: MEASURE AN EXISTING RING

1. Select a ring that fits perfectly. It should slide off with a slight tug but you shouldn't have to pull to take it off.
2. Place the ring on top of the circle below until the inside edge of the ring matches the outside of the circle.
3. If the ring falls between sizes, your size is a half size.
